Sudeep Industries has been a leader in the PVC Compounding Industry for over years. Our standard product line encompasses hundreds of PVC Compounds and colours. We continue to develop new compounds that meet and exceed customer requirements, while reducing their manufacturing Cost.

Our team develops experiment formulas using lab compounding equipments that allows us to move quickly from concept to reality.

We manufacture standard PVC formulas and colour which are being supplied for the use in a multitude of injection moldings, sheeting and extrusion application including electronics, automotive and medicals just to name a few.

If you require a custom compound, please call **Sudeep Industries** for prompts personal assistance. We will work with you to produce compound that suit your applications. We also supply medical grade tubing and sleeving through our associate concern **M/s Polymer Processors**, Ahmedabad.

Leaders in the PVC Compounds

Manufacturer of PVC Compounds
PVC Master Batches, Solvent Cement

High Performance PVC Compounds

Injection Molding

Medical Compound
